Definitions

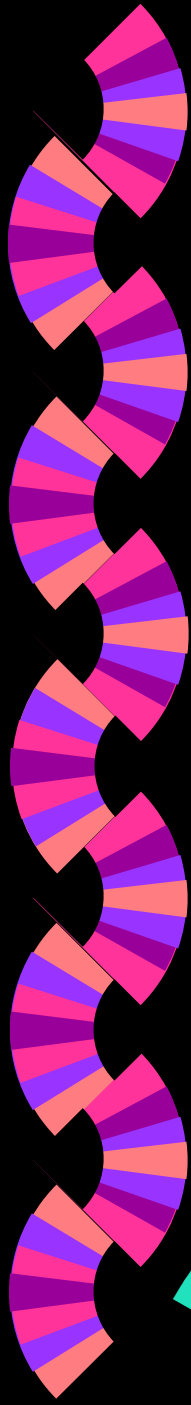

Norm-Referenced Test - An individual or group performance compared to other individual or group performances.

Criterion-Referenced Test - A student's performance is held to a standard. He/she reaches or does not reach an established criterion. ISAT and PSAE are criterion-referenced tests.

Test Validity - The degree to which a test measures what it purports to measure.

Test Reliability - The degree to which a measure will yield similar results for the same subjects at different times or under different conditions.

Variance – The sum of the difference between Prairie Central and the State of Illinois in the categories of “Warn/Below,” “Meets,” and “Exceeds.” A single digit in this column means the difference between Prairie Central and the State was probably not significant; double-digits mean the difference was probably significant.

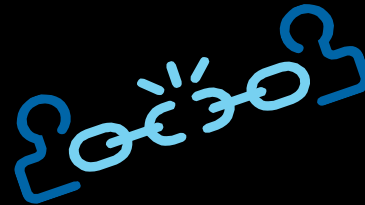

“Overall we’re seeing students and schools make progress in Illinois and that is a positive sign, but we know there is a disconnect between elementary and high school.”

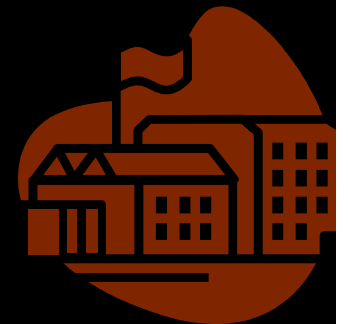

~Christopher Koch, Superintendent of Education
